PRADEEP PATIL

Software Developer

Maharashtra, India | 7972134790 | patilp9931@gmail.com

PROFESSIONAL SUMMARY

Software Developer with a solid foundation in full-stack web development, working across Java, Spring Boot, Laravel, React.js, and MySQL to ship database-driven applications. Comfortable moving between backend logic and frontend interfaces, having contributed to a live HRMS platform during a six-month internship at SeaQuid Technology. Brings a clear understanding of object-oriented design, CRUD-based API development, and everyday tools such as Postman and Git, and is looking to grow further as a full-stack or backend developer.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, PHP, SQL

Core Concepts: Object-Oriented Programming, Collections Framework, Exception Handling, Multithreading, Interfaces, Abstraction

Backend Development: Spring Boot, Spring MVC, Laravel, REST APIs, JPA Basics, JWT Basics,Hibernate,Spring Ai

Frontend Development: React.js, HTML5, CSS3, Bootstrap

Database: MySQL,MongoDB

Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code, Postman, XAMPP

Testing: Manual Testing, Selenium Basics

INTERNSHIP EXPERIENCE

Software Developer Intern — SeaQuid Technology, Kolhapur *April 2026 - Present (6 Months)*

Live Project: HRMS (Human Resource Management System) | Laravel, MySQL

- Working on a live HRMS platform for six months, using Laravel for backend logic and MySQL for data storage.
- Designed and coded the dashboard and login screen so users could navigate the system smoothly and securely.
- Created several dynamic forms inside the HRMS for tasks like employee records, attendance, and report generation.
- Wrote and tuned MySQL queries to handle day-to-day CRUD operations behind the HRMS modules.

PROJECTS

Gift Website Builder *Java | Spring Boot | React.js | MySQL | REST API*

- Designed a platform where users can build and publish their own gift websites by picking from reusable templates.
- Structured backend REST APIs around users, occasions, templates, and websites using a Controller-Service-Repository pattern.
- Connected the Spring Boot backend with MySQL and a React.js interface to keep data flowing smoothly between them.
- Covered the full user journey — sign-up, login, template selection, customization, and publishing the finished website.

Student Management REST API *Java | Spring Boot | REST API | MySQL | Postman*

- Built a set of REST APIs in Spring Boot to manage student records with complete CRUD capability.
- Set up GET, POST, PUT, PATCH, and DELETE routes, keeping Controller and Service logic clearly separated.
- Used Java Collections and validation logic to handle requests safely, and verified each endpoint using Postman.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering

Ashokrao Mane Group of Institutions (AMGOI) | 2022-2026 | CGPA: 7.0

Higher Secondary Certificate (HSC)

2021 | 84%

Secondary School Certificate (SSC)

2019 | 72%
